

# Internship / Master Thesis for biologists (w/m) No: 039-0818

LenioBio GmbH is a young, highly innovative life science company, which offers the unique cell-free protein expression technology ALiCE™. At LenioBio, everything we do begins with our Mission: to provide our customers with innovative solutions that address their toughest challenges – easy, quick and more efficient than ever before.

To support our team located in Aachen, we offer internship and Master thesis opportunities (minimum 6 months).

## Job description

Our development department innovates through intelligent design and harnessing the power of nature to accelerate synthetic biology.

You will be part of the ALiCE™ R&D team.

Possible projects include:

- Design of experiments
- Application and process development
- Protein purification and quantification

## Your profile

You are making your Master's study in biology or a related subject. With your curious nature, you are highly motivated to use your knowledge in biological protein synthesis in applied science. Further, you are interested in synthetic biology and protein biochemistry and are fluent in German and English.

For more information, please contact  
Dr. Victoria Steffen (+49 241 6085 35071,  
v.steffen@leniobio.com).

Are you interested? Please send your full application in English including your possible starting date and referring to no. 039-0818 in one pdf-file to [careers@leniobio.com](mailto:careers@leniobio.com).
